19. Questions people ask

1. Signing in

- 1 Open the address the school gave you.

2 Type your username and password.

3 Choose **Sign in**.

The image shows a sign-in interface for 'TOP GOAL 3 Smart Shift'. At the top, there is a logo with a purple square containing a white wave-like symbol, followed by the text 'TOP GOAL 3' in bold and 'Smart Shift' in a smaller font. Below the logo, the title 'Sign in' is displayed in a large, bold font. Underneath the title, a message reads: 'Use the username you were given, not an email address.' There are two input fields: the first is labeled 'Username' and the second is labeled 'Password'. The password field has a small eye icon on its right side. Below the input fields is a purple button with the text 'Sign in'. At the bottom of the form, there is a link that says: 'Forgotten your password? [Send me a reset link](#). If your account has no e-mail address, ask your teacher to reset it for you.'

The sign-in screen.

Capital letters in your username do not matter.

Teacher, teacher and TEACHER all reach the same account. Your *password* is different: every capital in it counts.

Checking what you typed

Every password box has an eye at its right-hand edge. Press it to read what you typed, and press it again to hide it. The box is never revealed on its own, and what you typed is not lost when you look at it.

Sign in

Use the username you were given, not an email address.

DemoGuide2026!

Sign in

Forgotten your password? [Send me a reset link](#). If your account has no e-mail address, ask your teacher to reset it for you.

The eye shows the password while you check it. Press it again to hide it.

2. Finding your way around

Four places, always along the top:

Where	What it holds
Dashboard	Who needs a look at today.
Class progress	Every student, and how far each has gone.
Students	Adding accounts, resetting passwords.
Curriculum	Your units, and everything inside them.

The speech-bubble icon beside your name is your messages. Your name opens your own settings. **Sign out** is at the far end.

3. The dashboard

This is the first screen after you sign in, and it answers one question: *who should I look at today?*

The dashboard. **Worth a look** on the left, class figures on the right.

- **Worth a look** — students who have not started, or who have stopped.
- **This class** — average progress, how many have finished, how many have not begun.
- **By unit** — which units the class is moving through.
- **Everyone** — the whole class, newest work first.

Choose any student's name to open her own page.

4. Your course and its units

Curriculum lists every unit, with what each one holds.

course units

open to students

words

questions

Draft means saved and not visible to students. Publish an item to release it — and open the unit, or nothing in it is visible. Saving never publishes anything.

A student sees an item only when the item is published *and* its unit is visible. In a visible unit, **a change to a published item is live straight away** — hide the unit first to work on it privately.

No test

Each row shows a unit, what is in it, and whether students can see it.

Units sit in two groups:

- **Course units** — these count towards a student's progress.
- **Extra practice** — offered to students, but not counted.

Choose a unit's name to open it. Inside, four tabs follow the order a student meets them: **Vocabulary, Grammar, Activity, Unit test**.

5. Draft and Published — the one rule that matters

If you read only one section, read this one.

Two things must both be true before a student sees anything.

The item must be

Published

, *and* its unit must be

visible

. Miss either and she sees nothing.

Word	Meaning
Draft	Saved, and not visible to students. Safe to work on.
Published	Released — visible, once the unit is visible too.
Hidden from students	The whole unit is closed, whatever is published inside it.

Saving never publishes anything.

You can correct a draft all day and no student sees a word of it. But in a unit that is already *visible*, a change to an already-*published* item is live straight away. To work privately on a live unit, hide the unit first.

6. Words

The **Vocabulary** tab holds the unit's words: the English word, its Arabic meaning, and a picture or a recording where you have added one.

TOP GOAL 3 Smart Shift | Dashboard | Class progress | Students | Curriculum | Sample T... | Sign out

< Curriculum

Living Things

✓ Visible to students

Publish drafts... Hide from students

Draft means saved and not visible to students. Publish an item to release it. Saving never publishes anything.

This unit is visible. A change to a published item is live straight away — there is no separate draft copy. To work on it privately, hide the unit first.

Vocabulary 26 Grammar 2 Activity 41 Unit test 0

Vocabulary

26 words

English word Arabic meaning

English Arabic Sound Status Actions

tortoise	سلحفاة	Device voice	Published Visible to students	Hide Edit Remove
beetle	خنفساء	Device voice	Published Visible to students	Hide Edit Remove
touch	يلمس	Device voice	Published Visible to students	Hide Edit Remove
butterfly	فراشة	Device voice	Published Visible to students	Hide Edit Remove

The words in a unit.

- 1 Open the unit and stay on **Vocabulary**.
- 2 Add the English word and its Arabic meaning.
- 3 Add a picture or your own recording if you want one.
- 4 Save. It is a draft until you publish it.

A word with no Arabic meaning cannot be used in a game.

Memory Match and Quick Match pair a word with its meaning, so a word missing one is left out of both.

7. Grammar

The **Grammar** tab holds the unit's grammar pages — an explanation, examples, and a picture of the page from the book where you have added one.

Vocabulary 26

Grammar 2

Activity 41

Unit test 0

Grammar Adventure

Ready to play

Your grammar questions here are what students play in Grammar Adventure. **13** of them can be used, and it needs 3.

Only questions a student can answer by tapping count — ordering words, true or false, and multiple choice tied to a grammar page. Ones she has to type an answer to are left out, because typing is not a way through a world.

See it as a student

Records nothing

Vocabulary 26

Grammar 2

Activity 41

Unit test 0

How this test runs

Set for the whole course

Pass mark	Tries allowed	Questions asked	Score kept
80%	2	10	Her best try

This unit has no test questions of its own, so the test draws from its **41 activity questions**. Add a question here and the test will use only the questions you add.

See it as a student

Records nothing

Show me

Assessment questions (0)

☐ Only those needing a check

Add a question

The questions a student must pass to finish the unit. A question you add here is used by the test and never mixed into the practice activities. The panel above says where this unit's test draws from today.

Test questions are separate from practice questions.

10. Releasing a unit to your students

- 1 Open the unit and check each tab holds what you want.
- 2 Publish the items you want released. They can be published one at a time.
- 3 Choose **Review and publish...** on the unit.
- 4 Read what it tells you is not ready, and fix anything you want to fix.
- 5 Make the unit visible.

On the Curriculum screen the unit's chip changes from **Hidden from students**, and the count at the top of the page — *open to students* — goes up by one. That count is the quickest check that a release worked.

11. Games and Grammar Adventure

There are three games. They are for practice and enjoyment: **nothing a student does in a game is recorded** — no progress moves, no score is kept, no test attempt is spent.

Game	What it plays	Needs
Memory Match	The unit's words and meanings.	6 complete words
Quick Match	The unit's words and meanings.	4 complete words
Grammar Adventure	The unit's grammar questions.	3 usable questions

Grammar Adventure is made from your questions

The game has no content of its own. It plays the published grammar questions from the unit's **Activity** tab — so writing those questions is what switches the game on. The Activity tab tells you where the unit stands:

Grammar Adventure

Ready to play

Your grammar questions here are what students play in Grammar Adventure. **13** of them can be used, and it needs 3.

Only questions a student can answer by tapping count — ordering words, true or false, and multiple choice tied to a grammar page. Ones she has to type an answer to are left out, because typing is not a way through a world.

At the top of the Activity tab: how many questions the game can use.

Only questions a student can answer by tapping are counted.

Ordering words, true or false, and multiple choice tied to a grammar page. Questions that need a *typed* answer — spelling, for instance — are left out, because typing is not a way through a world. If you are one short, that is usually why.

12. Your students

Students is where accounts are made and looked after.

3 students

Sort by **Name**

Amal Hassan amal.demo	Temporary password Never signed in >
Noura Salem noura.demo	Temporary password Never signed in >
Reem Khalid reem.demo	Temporary password Never signed in >

Your students.

Adding a student

- 1 Choose **Add a student**.
- 2 Type her full name and a username.
- 3 Set a first password and write it down before you leave the screen.
- 4 Save.

The first password is temporary, and shown once.

She is asked to choose her own the first time she signs in. You cannot read it again afterwards — nobody can, not even the school's administrator. If it is lost, reset it.

Two usernames cannot differ only in capitals.

If sara exists, Sara is refused — because the two would be the same name to a student trying to sign in.

Resetting a password

- 1 Open the student on the **Students** screen.
- 2 Choose to reset her password.
- 3 Give her the new one. She is asked to change it when she next signs in.

13. Watching progress

Class progress shows every student and how far each has gone.

The screenshot shows the 'Class progress' page. At the top, there's a navigation bar with 'TOP GOAL 3 Smart Shift', 'Dashboard', 'Class progress' (active), 'Students', 'Curriculum', 'Ms. Sam...', and 'Sign out'. Below the navigation bar, the page title is 'Class progress' with a subtitle '3 students across 1 units.'.

There's a search bar 'Find a student' with a placeholder 'Name or username'. To the right of the search bar are filters: 'Everyone 3', 'Worth a look 0', 'Working 0', 'Not started 3', and 'Finished 0'.

Below the filters is a table with the following columns: 'Student', 'Overall', 'Living Things', 'Last worked', and 'Open'.

Student	Overall	Living Things	Last worked	Open
> Amal Hassan amal.demo	0% 0 of 1 units	Not started	never	>
> Noura Salem noura.demo	0% 0 of 1 units	Not started	never	>
> Reem Khalid reem.demo	0% 0 of 1 units	Not started	never	>

Class progress.

Choose a student to open her own page: which words she has learnt, which grammar pages she has read, how her activities and tests went, and when she last worked. You can write to her from the same page.

14. Messages

The speech bubble at the top right is your messages. A number on it means something is waiting. It checks for new messages roughly every two minutes.

Choose it to see which students are waiting, and choose a student to open her conversation. Messages stay inside the platform.

15. Your WhatsApp number

Your settings — behind your name at the top — hold a WhatsApp number.

The screenshot shows the 'My details' settings page. At the top, there's a navigation bar with the logo 'TOP GOAL 3 Smart Shift' and links to 'Dashboard', 'Class progress', 'Students', 'Curriculum', 'Sample T...', and 'Sign out'. The main heading is 'My details'. Below it, there are three input fields: 'Your name, as students see it' with the value 'Sample Teacher', 'Title' with the value 'Ms.', and 'Your WhatsApp number' with the value '+966 50 000 0000'. A note below the WhatsApp number field states: 'Include the country code. Your students are offered a "message my teacher" button only while a number is set here, and it always goes to their own teacher — never to anyone else. Clear the box to take it down.' A 'Save' button is located at the bottom left of the form.

Your own settings. The number is yours to set and yours to remove.

- 1 Open your settings from your name at the top.
- 2 Type the number including the country code, for example +966 5x xxx xxxx.
- 3 Save.

Nothing is shown until you set it.

While the box is empty, no WhatsApp button appears anywhere and no number exists in the platform. Your students see the button only once you have set a number, and only your own students see it. Clearing the box takes it down again.

16. Passwords — yours and theirs

If you forget yours

- 1** Choose **Forgot your password?** on the sign-in screen.
- 2** Type the e-mail address on your account.
- 3** Follow the link that arrives. It expires, and works once.

If your account has no e-mail address, ask your school's administrator to reset it for you.

If a student forgets hers

Reset it from the **Students** screen — see section 12.

17. Signing out, and being signed out

Sign out is at the top right. Use it on a shared staffroom machine.

You are asked before you are signed out.

After twenty minutes with nothing happening, a box appears and counts down for a minute. Choose

Stay signed in

and nothing is lost. It is there for the tablet left on a desk with a register still on the screen.

18. When something goes wrong

A student says she cannot see a unit you published.

Check both halves: the item must be

Published

and the unit must not be

Hidden from students

. On the Curriculum screen, the *open to students* count at the top tells you how many units are actually released.

She cannot sign in.

Capitals in her username do not matter, so that is not the cause. Check the username is spelled right, and reset her password from the Students screen. If she has just changed her password, she has to sign in again with the new one — that is normal.

Grammar Adventure is missing, or says it needs more.

Open the unit's

Activity

tab and read the panel at the top. It needs three questions a student can answer by tapping. Spelling and other typed questions do not count towards it.

A word is missing from Memory Match or Quick Match.

Both games pair a word with its Arabic meaning. A word with no meaning cannot be paired, so it is left out.

You changed a published item and students saw it immediately.

That is how a visible unit behaves. To work on a live unit privately, hide the unit first, make your changes, then make it visible again.

The screen says your session has ended.

Sign in again. If it keeps happening, tell the school's administrator — an account that has been deactivated, or a school that has been closed, ends sessions straight away.

19. Questions people ask

Do games count towards a student's progress?

No. Nothing in a game is recorded — not progress, not a score, not a test attempt. They are for practice and enjoyment.

Can I see a student's password?

No, and neither can anyone else. Passwords are not stored in a readable form. If one is lost, reset it.

Can another teacher see my class?

No. You see your own students. Your school's administrator sees the school. No-one outside your school sees anything at all.

Does saving publish my work?

Never. Saving and publishing are separate, deliberately.

Can I work on my phone?

Yes. Every screen works on a phone, though the unit editor is easier on a larger screen.

What happens to a student's work if I delete her account?

Ask before you do it. Removing an account is not the same as correcting a mistake in a name, which you can edit directly.

TOP GOAL 3 — Smart Shift · Teacher Guide

Screenshots are from the working platform, taken with a demonstration account.
